I have another Latin document from 1387, written in Gothic secretarial hand. The attached image is a picture of that document and I want you to transcribe it. This document takes up a full page, plus a little on the previous and subsequent page. I will provide you with what comes before and after what I would like you to transcribe. Here is what comes before: "Johannes et cetera, fidelibus vicario Berge et Bergutani ac baiulo villem Berge aliosque officialibus nostris ad quos spectet presentibus et fuitis eaorumque locatentibus". Here is what comes after the page in the image: "valeant prout decet. Super his talitere vos habendo quod de necligentia non possatis recrearqui alii ascribeter et merito culpe vostre."

Here is the line-by-line transcription of the Latin document from 1387 shown in the image **jun-17-transcribe-f6v.jpg**.

Abbreviations have been expanded into their full classical/medieval forms for clarity, and a slash (/) is used where the scribe included a virgule or modern line-break punctuation.

Context Note

This royal administrative order from King John I of Aragon (Johannes et cetera) addresses an audacious robbery. Following the death of Abbot Bernardo Rull of the Cistercian monastery of St. Peter (likely Sant Pere de de les Puellas or another closely related Cistercian house in the region of Zaragoza/Berga), the deceased abbot's brother, also named Bernardo Rull, broke into the monastery chests (capsas siue cofres) at night. He made off with luxury items, including silver cups (taceas), legal and medical books, precious cloths from London (panni de londres), weapons, and a mule. The King is commanding the local officials of Berga to secure the stolen property and ensure its full restitution to the new abbot, Michael.
